# Download, Install and Configure Linux

# Lab Design

Option 1

Linux

Virtual Machine

VMWare player   Oracle VirtualBox

Virtualization software

Microsoft Windows   Mac OS

Option 2

Linux

Virtual Machine

aws   Google Cloud

Cloud Services

Microsoft Windows   Mac OS
What is Oracle VirtualBox?

- VirtualBox is a free and open-source hypervisor for x86 computers currently being developed by Oracle Corporation

- It installs on your existing Intel or AMD-based computers, whether they are running Windows, Mac, Linux or Solaris operating systems. It extends the capabilities of your existing computer so that it can run multiple operating systems on one hardware at the same time
